***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

A sifter comprising a movable box connected to a movable tub is known (See e.g., Overstrom et al., US 2,285,678, Fig. 3 and Kreft et al., US 6,508,364, Fig. 1, 2). The additional features, however, of at least one rigid mobile element movably interconnecting the box and tub and at least one support movably carrying the at least one mobile element, wherein an elastic element maintains the oscillating motion of the box and tub to achieve stability and intensification of the jiggling process render the invention novel and non-obvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
